BIO POOL 5 actions

HOMOLOGACIÓN
Nº 01-60-1474
PRODUCTO HOMOLOGADO POR LA DIRECCIÓN GENERAL DE LA SALUD PÚBLICA Y CONSUMO - D.G.S.P. y. c. -

**Liquid water
treatment for Pools
WITHOUT
CHLORINE**

- 1** Covers the effect of chlorine
- 2** Anti-algae action
- 3** As effective as Flocculant
- 4** pH stabilizer
- 5** Anti-calcium effect

BIO POOL 5 actions

Reduces Chlorine
up to 75%.

It is advisable to maintain a minimum chlorine level of 0'3 to 0'6 p.p.m. with water temperatures above 20 °C.

Compatible with any chlorine pool treatment products

12

Reasons To Use Bio Pool 5 Actions

- 1 Avoid the eye irritation caused by chlorine.
- 2 The exhaustive control of chlorine products is not required thanks to Bio pool 5 Action's persistent effect (you can use 1 doseper week).
- 3 Does not discolour fabrics as do oxidizing products, such as sodium hypochlorite, hydrogen peroxide, chloroiso cyanate, etc...
- 4 Does not damage textile fabrics such as cotton, nylon, etc...
- 5 Does not lose its effectiveness when water is pH unbalanced.
- 6 Compatible with chlorine products and hydrogen peroxide so, if desired, you can alternate with conventional chlorine treatments.
- 7 We avoid the handling of the product thanks to its auto-dosing container.
- 8 Avoid strong odors associated with pool water (Cloramine, etc...).
- 9 It's a more ecological product in its chemical reaction and its packaging, which is 5 times less than conventional products.
- 10 It develops a great effectiveness against bacteria, fungus, algae, small moluscs and micro-organisms common to pools.
- 11 Avoid the corrosive effect of hypochlorite and other products that release chlorine. (Avoid the discolouration of dyed hair, etc...).
- 12 Minimum storage and great advantages in transportation; 1 L. of Bio Pool 5 Action equals 5 L. of conventional products.

Properties:

- Effective chlorine substitute.
- Algaecide, anti-bacteria and fungicide to protect against micro-organisms common to pools like Pseudomona, Chlorella Vulgaris, Fusarium Solani, etc...
- Great Flocculant effect, which eliminates suspended particles.
- Does not alter water pH level.
- Highly soluble with immediate action.
- Ideal for disinfecting change-rooms, toilets, saunas, pool borders, etc...
- Non-oxidizing.
- Avoids eye irritation.
- Anti-lime effect.
- Does not become ineffective in pH unbalanced water.

Composition:

- Quaternary cationic polymer, sequesting agent...

Use and Dosage:

- It's recommended to administer the product at dusk, after swimming.
- Once the filter equipment is operational, add the product near the water jets in order to spread the product throughout the entire pool.
- It's possible to swim even after applying shock treatment.

Shock treatment:

- Add between 20 and 40 cm³ per m³ of water.
- Normal conditions: 20 cm³/m³ of water.
- Severe conditions: 40 cm³/m³ of water.

Maintenance Treatment:

- Add between 2 and 4 cm³ per m³ of water once a week.
- Normal conditions: add 2 cm³/m³ of water each 7 days.
- Severe conditions: add 4 cm³/m³ of water each 7 days. (between 200 and 400 cm³ weekly for each 100 m³ of water).
- In times of excessive heat or high numbers of swimmers, double the dose each 15 days.

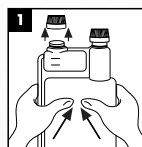

Change-rooms and Saunas:

- Use a dilution of 2 to 4 cm³ in 10 L. of water.

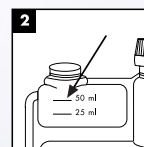

Precautions:

- The product irritates skin and eyes when in direct contact.
- Keep out of reach of children.
- Keep away from food, drink, animal feed, etc...
- Avoid contact with eyes and skin.
- Store the product in its original container.
- In case of ingestion, immediately seek medical attention and show the product label and container, or call the Medical Service of Toxicological Information:

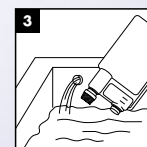

Telephone. +34 91 562 04 20

Squeeze the container so that the liquid rises up the channel.

Fill the autodoser to 50 c.c.

Add the required dose near the water jets.
