

Further advantages

- No need of hoses or water jets but only two clothes in black and green. You pulverize and retire the strongest dirt with the black cloth and you polish with the green one.
- Don't get dirt yourself, don't get wet and use it anywhere.
- It doesn't screw the surface.
- Removes even the strong dirt. It also removes insects, oxid stains and birds dirt.
- Increases and protects the car shine against oxids, salpeter, sun damages etc.
- Antistatic and repellent effects. The more you use it the more you protect your car.
- Useful for all kind of vehicles: cars, motorbikes, quads, caravans, boats...any non-porous surface.
- Revival of polished surfaces. Excellent finish on crystals and windows.
- Useful on wood, pvc, plastic, steel, metal etc. Avoid porous surfaces such as motor seats or fronts, etc.

BIOECOLIMP CAR WASH is a waterless cleaning product due to its complex and efficient formulation, developed by **ALCOR QUÍMICA** laboratories. It contains a **three-film** formula which enables the encapsulation of the dirt, so it removes it without screwing the car's surface or painting. Besides, it's polisher components absorb the contaminants lying at the surface as well as removes the stains, harshnesses, little screws, oxids and other damages.

Finally, a thin film of Carnuba wax lays on the surface and polishes it. Carnuba is the most resistant natural wax, which offers a long protection and brightness. **BIOECOLIMP CAR WASH** seals and repairs the microscopic screws made by normal and diary use of the vehicle, it becomes a special way to take care of it.

We recommend to begin with the softer surfaces and finish with the strongest, such as rims. Wash the clothes after use.

BIOECOLIMP CAR WASH is being formulated on high technology tensioactives 100% biodegradables, according to UE directives.

BIOECOLIMP CAR WASH is not classified as dangerous product according to the law.

NOT irritating
NOT dangerous for the environment
NOT dangerous for health
NOT corrosive
NOT inflammable
NOT toxic

Bioecolimp Car Wash

¿Why **BIOECOLIMP CAR WASH**?

- Water is becoming more and more a narrow resource.
- Spain is living now a hard period since last 60 years. It's time to **rationalize the use of water** according to the directives of our government and Institutions all over the world.
- The biggest part of water consumption goes to agriculture, 79,5%. The rest, around 20% it's for industrial and domestic use.
- Water covers 80% of the Earth's surface. Though we may think it's more than enough it's important to notice that only 1% is useful for domestic, industrial, turistic or commercial use.
- Half of the rivers in the planet are seriously contaminated and whole regions already have problems to get and distribute the water.
- Water is a **narrow and precious resource**; it's a duty of all of the citizens to use it in an appropriate way to ensure future generations a more comfortable living.
- To be aware of all these facts makes necessary to create a new water culture oriented to change our habits and avoid the waste of it, as we're doing nowadays.

BIOECOLIMP CAR WASH is created and developed into this feeling, we're searching for this new environmental culture and trying to stop one of the reasons of such a big diary waste of so many litres of water with the car cleaning.

To create a new way of thinking it's a hard

matter to afford and probably our generation will not make it true, but it's our aim for each and everyone to take part on the **Solution but not in the Problem itself**.

Waterless is the main characteristic of this products and it's major profit. It doesn't need any water to get a perfect washing, cleaning and polishing. Water save is incredible in comparison with the traditional systems of cleaning.

We save from 130 and 150 litres per car cleaning

	Types of cleaning	Litres per car
Traditional System	Manual hose cleaning	Up to 500l (water flowing during the process)
	Manual sponge and cube cleaning with hose and closing fuzs	Under 50l (mostly on finishing)
	Cleaning tunnel (non recycling water)	Between 200 - 300. litres
	Cleaning Tunnel (recycling water)	Between 75 - 100. litres
	Cleaning Boxes (high pressure pipes)	Between 40 - 50. litres
NEW!	ECO WASH	0 litres

Other characteristics of this new product

- Double respect with the environment: waterless consumption and avoids spills of foam to drainers, so it avoids contamination.
- Easy use: one only product for cleaning, polishing and waxing.
- No need of special equipment.
- Takes less time than the traditional systems (15-20 min). Complete cleaning in three steps: pulverize, retire the dirt and polish.
